M18, Tai Thiet Khanh Hoi, Ward 6, District 4, Ho Chi Minh City

Career goals

I am eager to apply the knowledge and skills gained from my university studies in Information Technology to real-world scenarios in a professional environment. During my internship, I aim to deepen my understanding of backend development, particularly in .NET and related technologies, and to gain hands-on experience working on complex projects. I am committed to proactively learning and improving, while contributing to the team's success through dedication and a willingness to tackle challenges. Ultimately, my goal is to develop a strong foundation in backend development and to secure a full-time position within the company, where I can continue to grow and contribute over the long term.

Skills

Hard Skills

· Programming Languages: C#, SQL

· web Development: ASP.NET Core, MVC

Databases: SQL Server, Dapper

Version Control: Git

Tools: Visual Studio, SQL Server Management Studio (SSMS)
